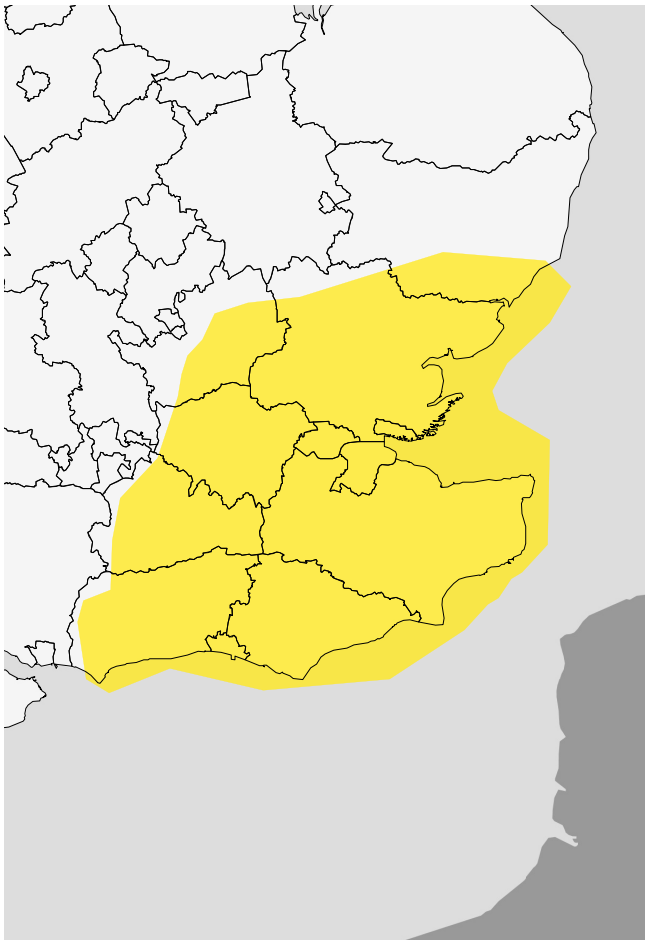
Yellow warning
Snow & Ice

Between
18:00 Sun 11 Dec 2022 and
09:00 Mon 12 Dec 2022



Snow may push in across parts of east and southeast England, leading to a risk of travel disruption especially on Monday morning.

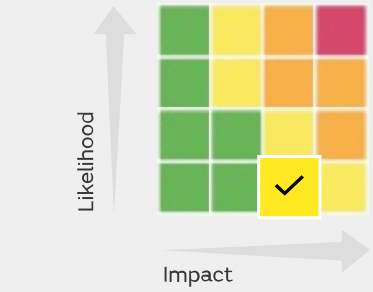
What to expect

- There is a small chance of travel delays on roads with some stranded vehicles and passengers, along with delayed or cancelled rail and air travel
- There is a slight chance that some rural communities could become cut off
- There is a small chance that power cuts will occur and other services, such as mobile phone coverage, may be affected
- A small chance of injuries from slips and falls on icy surfaces
- A small chance that untreated pavements and cycle paths become impassable

Further details

While confidence is very low at this stage, there is a chance that a band of sleet and snow could push into east and southeast England. This has the potential to give accumulations of 2-5cm quite widely, and perhaps up to 10cm in some places. The areas most likely to be affected are in Kent and Sussex with the higher ground here most exposed.

In addition, ice is likely to form on untreated surfaces, mainly nearer to coasts where rain or sleet is more likely.



Very low likelihood of medium impacts
